Query Builder

© 2001 - 2006 RJM Systems – all rights reserved

Although it can be broadly used for “finding stuff” and printing the results, Query Builder is most useful for finding a group of people to whom you want to send a e-mail note, export a list, or set an activity.

March 2006

Systems, Inc.

The logo for RJM Systems, Inc. consists of the letters 'R', 'J', and 'M' stacked vertically in a stylized, blue, serif font. To the right of this logo, the text 'Systems, Inc.' is written in a blue, italicized, serif font.

NEW IN THIS EDITION

- This is a new manual for this new function of SONISWEB® version 2.0.

NAVIGATING THE FUNCTIONS

• Figure 1 Toolbar¹ for those with User-ID access

Administrative users have User-IDs and Passwords and see an initial display like Figure 1. Administrative users can be anyone in your system with an ID but typically they're paid Staff and those few Faculty with additional administrative duties.

The access rights of an administrative user is defined by:

1. The **Profile** selected when you were issued a User-ID and Password. Typical Profile categories are the Registrar, the Registrar's staff, the Financial Officer, Admissions staff, Deans, etc. One profile covers all the people in each staff category.
2. The **individual limits** specified for you when you were issued a User-ID and Password. A typical limit is preventing access to faculty and staff personal records.
3. The **privileges** added for you when you were issued a User-ID and Password. The right to "Make Grades Official" or "View and Change PINs" are examples.

• Figure 2 Function Lists¹ - Partial

After clicking **Systems** in Figure 1 you get the selections shown in Figure 2.

Diagnosing and Fixing Problems

See the text "Messages, Errors, and Diagnosis".

Setting Your Browser for Proper Function and Security

Internet Explorer² (IE), FirefoxTM, Netscape[®], and Opera Web browsers have an "auto-complete" or password-form save feature that is handy for individual computers but defeats privacy on shared computers like those in computer labs and libraries. See the text "Browser Settings" to set your browser for security, good performance, and to prevent your getting old data.

¹ You only see what you're authorized to see by your Profile and individual Limits and Privileges. So your choices may be fewer than these.

² Only Internet Explorer (IE) version 5.5 or later is supported for administrative use.

BUILDING THE QUERY

Click **Systems** in Figure 1 then **Query Builder** in Figure 2. You see the very large display³ shown in Figure 3.

The query entries are laid out by SONISWEB® record such as “Address” or “Interests”.

Figure 6 on page 5 is a sample query.

Note there are Clear, Submit, and Reset buttons at the top and the bottom so, no matter where you are on this large display, you can find a button to submit the query.

You enter the query values in this way:

- A blank entry for a field means don’t test this item in the database; everything is acceptable.
- For most entries, you can pick one or more⁴ items. For example, you can choose Juniors and Seniors (Status) from Maryland and Virginia (State).
- Some fields require typed input, most commonly for dates. See “Date Input” on page 6.

The screenshot shows a 'Query Builder' interface with a grid of search criteria. At the top, there are 'Reset', 'Clear', and 'Submit' buttons. The criteria are organized into sections: Address (City, State, Zipcode, County Code, Country, Preferred, Citizen), Bio (DOB, Gender, Ethnic Code, Level, Dept., Division), GPA (School Year, Semester, Semester GPA, Cumulative GPA), Education (Degree, From, Advisor), Application (Terms of Interest, Date of Enquiry, Application Completed, Program Code Applied For), Disposition (Disposition, Date), Program & Major (Program Code, Archive Program, Major, Archive Major), Courses (School Year, Semester, Course ID), Enrollment (School Year, Semester, Enroll Status), Tests (SAT Math, SAT Verbal, ACT Math, ACT Science, ACT English, ACT Social Studies), Health (Item, Received, Expires), Interest (Interest, Periods Held, From, To), Special Needs (Special Need, Archive), Licenses (License, Date Received, Expires), Advisor (Advisor, Archive, Started, Stopped), and Employment (Employer, Contact, When Employed). A 'Check All' checkbox is at the bottom left, and 'Reset', 'Clear', and 'Submit' buttons are at the bottom right.

• Figure 3 Query Builder Display³

³ What you see in Figure 3 depends on your security limits as described on page 9.

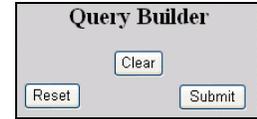

⁴ See Figure 20 on page 11 for guidance on selecting multiple items from a list.

- The “Check All” checkbox at the bottom of Figure 3 (enlarged in Figure 4) is used in the actions shown in Figure 12. If checked then all the checkboxes in Figure 12 are checked. If it’s blank, none of the checkboxes are checked.

• Figure 4 Check All

- Figure 5 shows the buttons at the top of Figure 3. Those at the bottom function the same way:

• Figure 5 Buttons at the Top and Bottom of Figure 3

Clear: when you use Return in Figure 10 or Figure 12 all your choices in Figure 3 remain as you set them. The Clear button erases them so you can make new settings.

Reset: if clicked before you click the Submit button, it erases what you’ve just entered in Figure 3. If a Return link brought you to Figure 3, you must use the Clear button to clear the settings.

Submit starts the query. You get a result summary like that shown in Figure 10.

Query Example

The screenshot shows the 'Query Builder' interface with the following settings:

- Address Section:**
 - City: [Empty text box]
 - State: [Dropdown menu with Virginia selected]
 - Zipcode: [Empty text box]
 - County Code: [Dropdown menu with Chatham selected]
 - Country: [Dropdown menu with Canada selected]
 - Preferred:
 - Citizen:
- Bio Section:**
 - DOB: [Greater Than] [01/01/1945]
 - Gender: [Empty dropdown]
 - Ethnic Code: [Empty dropdown]
 - Level: [Dropdown menu with High School selected]
 - Dept.: [Dropdown menu with OOM selected]
 - Division: [Dropdown menu with Business selected]
 - Campus: [Dropdown menu with Asian Campus selected]
 - Status: [Dropdown menu with Alumni selected]
 - Interest: [Dropdown menu with Alumni Association selected]

Buttons: Clear, Reset, Submit

• Figure 6 Query Example³

Here’s a simple query. As shown by the outlined settings in Figure 6, this is to find all Virginians born after January 1, 1945 who are alumni/ae. With the results from this query you can set an activity to send a mailing (Figure 14) or an e-mail message (Figure 15).

City Input

To query by city³, enter the full city name or a portion of the name. Figure 7 illustrates it.

• Figure 7 Partial City Name

You can also enter several city names separated by commas as shown in Figure 8.

• Figure 8 Several City Names

Date Input

You select the comparison from a list as shown in Figure 9.

As you start to type in the date, a calendar appears as illustrated in Figure 9. You can select the date from the calendar or you can simply type the date.

• Figure 9 Date Input

USING THE QUERY RESULTS

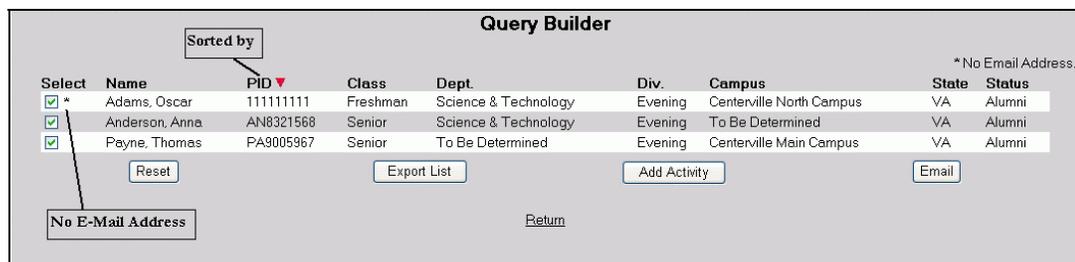

The summary of the query, shown in Figure 10, gives you three options:

- Click [Return](#) where the results indicate that you need to change the selections in Figure 3.
- [Preview Report](#) shows you the list of people found with the query. Figure 11 shows it.
- [... Distinct Users](#) shows you how many were found based on your selections in Figure 3. Click it to get Figure 12.

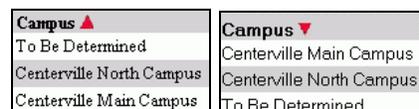

• Figure 10 Query Builder Result Summary

Enrollment Statistics						
Name	Class	Dept.	Div.	Campus	State	Status
Adams, Oscar	Freshman	Science & Technology	Evening	Centerville North Campus	VA	Alumni
Anderson, Anna	Senior	Science & Technology	Evening	To Be Determined	VA	Alumni
Payne, Thomas	Senior	To Be Determined	Evening	Centerville Main Campus	VA	Alumni

• Figure 11 Report

• Figure 12 Query Builder Actions from the Results

• Figure 13 Sort by Columns

To sort by one of the columns in Figure 12 click the column⁵ heading you want to sort by. Figure 13 shows what happens when you click another column in Figure 12. Click it again and it switches sort direction from descending to ascending, etc.

The action you take in Figure 12 depends on these factors:

- The checkmarks under Select in Figure 12 mean these persons are to be included in the action you start with the buttons at the bottom.

These all have checkmarks because you checked the “Check All” checkbox in Figure 3 (Figure 4). Had you turned off the checkmark in “Check All”, all the checkboxes in Figure 12 would be blank.

- The asterisks (*) beside checkboxes means there’s no e-mail address for this person. So if you use the Email button in Figure 12, those persons will never be sent the e-mail note in spite of the checkmark.

⁵ Where you want to sort by several columns, Export it as a spreadsheet (Figure 12) and use the sorting provided by the spreadsheet software.

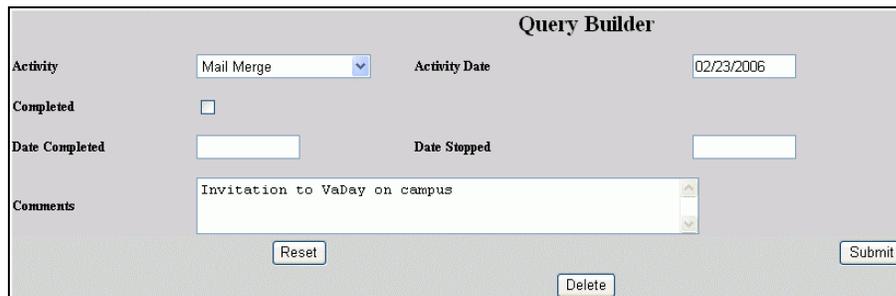

Action Buttons in Figure 12

Reset erases any checkmark changes you've made so you can start over.

Export List puts the list in a file for you to use as you wish. When you click the button, your browser asks you where you want it saved on your computer. Once on your computer you can open it in any spreadsheet program that supports the "xls" (Excel) file format.

Add Activity opens a dialog with the Activities function of SONISWEB® so you can create and add an activity for your records.

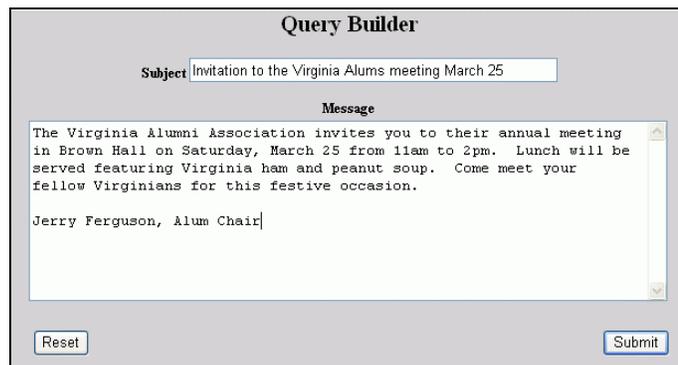

The screenshot shows a "Query Builder" dialog box. It contains several input fields: "Activity" with a dropdown menu set to "Mail Merge", "Activity Date" with a text box containing "02/23/2006", "Completed" with an unchecked checkbox, "Date Completed" with an empty text box, and "Date Stopped" with an empty text box. A "Comments" text area contains the text "Invitation to VaDay on campus". At the bottom, there are "Reset", "Delete", and "Submit" buttons.

• Figure 14 Add Activity

As Figure 14 shows it's much like adding an "Activity by Group", a standard SONISWEB® function. All those in the list (Figure 12) have the activity added for them.

Email gives you a prompt display for entering the e-mail note as shown in Figure 15. When you click the Submit button, the note is sent except to those with an asterisk by their names in Figure 12 indicating they don't have valid e-mail addresses.

The screenshot shows a "Query Builder" dialog box for sending an email. It has a "Subject" text box with "Invitation to the Virginia Alums meeting March 25". Below it is a "Message" text area containing the text: "The Virginia Alumni Association invites you to their annual meeting in Brown Hall on Saturday, March 25 from 11am to 2pm. Lunch will be served featuring Virginia ham and peanut soup. Come meet your fellow Virginians for this festive occasion. Jerry Ferguson, Alum Chair". At the bottom, there are "Reset" and "Submit" buttons.

• Figure 15 E-Mail from Query Builder Results

Return in Figure 12 takes you back to the Query Builder display, Figure 3.

LIMITS ON QUERIES

Only users with administrator login rights can use Query Builder. When User Security is set for an administrator, Query Builder limits are set as illustrated in Figure 16.

The screenshot shows the 'Query Builder Task' interface. On the left, a list box contains 'Address', 'Advisor', 'Applicant', and 'Bio'. Below this list are 'RESET' and 'SUBMIT' buttons. To the right, there are three columns of settings, each with a list box and a dropdown arrow:

Column 1	Column 2	Column 3
Courses	Health	Licenses
Education	Interest	Program/Major
Employment	Licenses	Prospect
Enrollment	Program/Major	Special Needs
GPA	Prospect	Tests

• Figure 16 Query Limitation Settings in User Security

These are limits for the individual beyond what the Profile allows and prohibits. For example, if “Special Needs” is not chosen in Figure 16, the Special Needs section of Figure 3 will not appear even if the profile assigned to the individual permits access to Special Needs records.

See the SONISWEB® manual “User Authorization & Profiles” for guidance in setting the limits shown in Figure 16.

GETTING STARTED - LOG IN AND THE USE OF TABS, BUTTON AND FIELDS

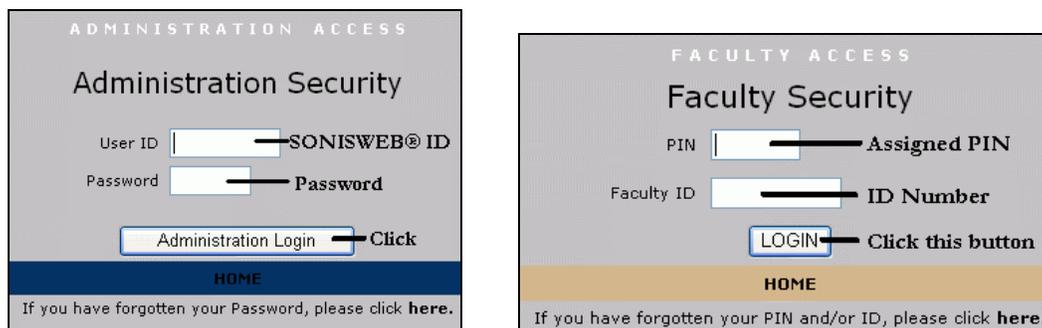

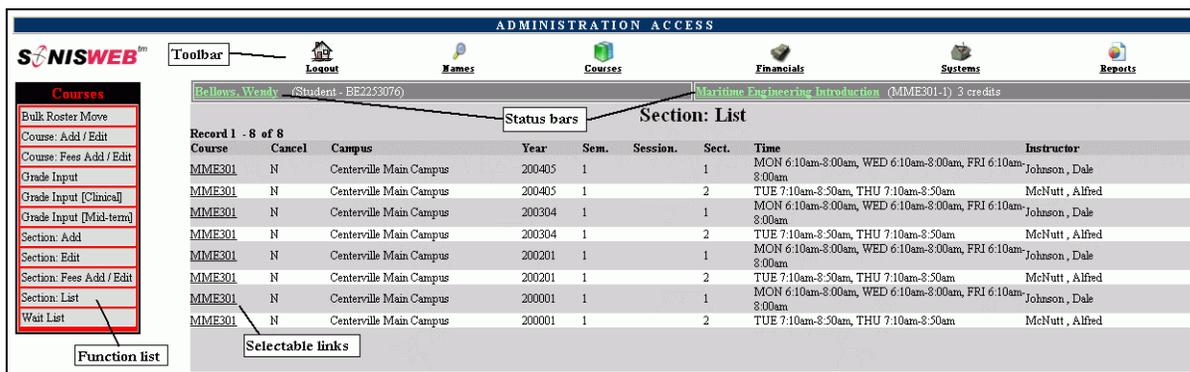

Figure 17 Login Displays

To log in as an administrator, select that option from your Web page. The standard SONISWEB® login pages look like Figure 17.

• Figure 18 Typical SONISWEB® Page

Figure 18 is a typical SONISWEB® page. The actions authorized in your profile appear at the top, called the **Toolbar**.

When you make a selection from the **Toolbar**, the applicable **Function List** appears on the left. Only the functions authorized in your assigned profile and your individual limits and privileges appear. Some might have only **Courses** in the toolbar and only **Course: Add/Edit** for functions.

Not apparent on the display is whether or not the profile permits editing or changing the information. Once the you select a function from the list on the left, you will see a Submit or similar button at the bottom of the display if you have the permissions to add, edit, or delete the data.

By clicking a **Status Bar** you quickly return to the “person” or the “course” you were processing even if you left it temporarily to look at a financial display or a report. Of course, if you have not selected a person with **Names** or a course with **Courses**, there will be no **Status Bars** at the top.

In Figure 18 click an underlined **Selectable Link** and you go to that record.

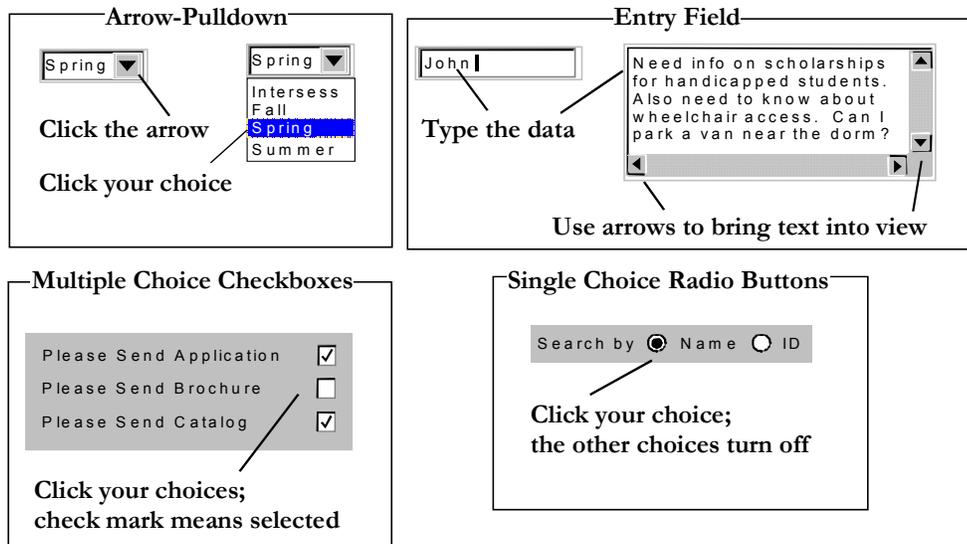

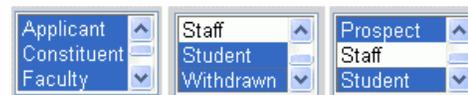

Figure 19 Arrows, Fields, Checkboxes and Buttons

SONISWEB® prompts you for information with windows like those in Figure 19. Use your mouse to click your selection.

- Once you have made your selection(s), you must click an action button; usually it is Submit, Delete, Reset, etc.
- For Entry Fields, click the beginning of the field so you don't get any blanks inserted in front of your entry.
- With Multiple Choice Checkboxes, each time you click a box it goes from selected (check mark) to unselected (no check mark). Click it again and it is selected, etc.
- Radio Buttons allow only one to be selected; when you click one, all the others are turned off.

Some SONISWEB® lists permit you to make multiple choices. It works just like most PC spread sheet software.

- To pick two or more in a series, click the top selection, hold down the **Shift** key on the keyboard and click the bottom item in the series. Release the shift key and they are selected as shown on the left and middle of Figure 20.

• Figure 20 Selecting Multiple Choices

- To pick two or more that are not adjacent, click the first item, hold the **Ctrl** key on the keyboard, select the next item and the next, etc. When you have picked the last item you want, release the **Ctrl** key and you see the selections like those on the right of Figure 20.
